

Accountability Manager

A complete solution that quickly and securely provides positive ID on-site and tracks daily activity of documented personnel and visitors.

Experience Greater Accountability

The Accountability Manager Solution (AMS) identifies and manages the day-to-day activity of people on company property quickly and securely. Identify, authenticate, track and report on all personnel/ visitors with a system that meets the requirements of tracking documented workers. Accountability Manager is flexible and can be tailored to meet specific needs based on organization requirements. Organizations experience a higher level of security, increased risk management and greater accountability using the Accountability Manager Solution.

Accountability Manager can be integrated with Elliott's companion products to enhance its capabilities and provide greater functionality. Users may benefit from being able to:

- Share personnel & visitor information gathered from multiple locations.
- Easily scan credentials at each entrance/exit and remotely throughout the area.
- Track and manage assets as well as assign assets to people.
- Track personnel without immediate supervision.
- Easily transport a mobile workstation to track personnel on- and off-site.
- Wirelessly transmit data in real-time using handheld devices.
- Backup data with a simple one click process.
- Form groups and search for specialties or assets.

Positive Identification

1. AMS provides both a stand alone or networkable solution that can quickly capture a driver's license or state issued ID, then populate a database.
2. A secure ID is produced on a high quality plastic card.
3. Credentials are presented for checking in/out at any entrance/exit. Accountability Manager allows you to scan a card and immediately track who is onsite, their purpose, location, and time spent onsite.

AMS Features

- > Track a person's information, location purpose, and time spent on-site.
- > Quickly capture data from a driver's license or state issued ID to produce IDs for visitors.
- > Improve security, risk management and accountability.
- > Accurately track on-site personnel and visitors for audits and reports.
- > Link multiple events together for reporting.
- > Link files to personnel and attach documents.
- > Select from multiple card designs.
- > Track certifications or specialties.
- > Access information remotely through web access.

Companion Products

The Accountability Manager software can be integrated with other hardware and software products to enhance the solution and build a more comprehensive system resulting in greater effectiveness and success.

Mobile Command Cases

The Mobile Command Case is a turn-key, integrated solution packaged as a compact, self contained workstation. This case is designed to quickly be transported and setup with little to no preparation.

- Available as a standard or mini command case.
- A mobile, compact design makes it easy to transport and store each case for quick access.
- Protected by a durable, water tight mobile case.
- Track people away from the command workstation.

Easily transport to multiple locations with little to no preparation!

Data Server

- Remotely synchronize your Command Center with the Data Server.
- Doubles as a backup for data recovery.
- Synchronize and share data with many Command Centers.

Tailor options of access to other Command Centers.

Mobile Tracking Devices

- Track personnel away from the command workstation.
- Wirelessly connect to the command workstation by transmitting data in real-time.
- Manage multiple entry and exit points at a site.
- Add multiple applications to each device.
- Search a personnel database.
- Read magstripe or barcoded Prox/MOCA/Smart Card IDs using a rugged, weather resistant mounted access box.

Stationary Tracking Devices

- Quickly capture data from a driver's license or state issued ID.
- Scan an ID to log in a person to an event.
- Capture data stored on a 1- or 2-D barcode or magstripe ID.
- Scan personnel in and out on-site without immediate supervision.

Asset Manager Solution

- Tracks products by grant, department & purchase date.
- Track information on items that require maintenance.
- Generate asset reports for accountability of state and federal grant purchases.
- Associate assets using a parent/child category relationship.
- Use a handheld device for quick & easy inventory tracking.
- Assign assets to people.

ID Badging System

- Multiple security features to choose from.
- Increased durability with virtual edge-to-edge laminates.
- Instantly issue quality IDs.
- Include color photos, logos & background images on IDs.
- Theft-detrant software and hardware lock system.

IDPix 1000 Professional

- One click photo capture & auto cropping.
- Quickly capture high quality photos.
- Cable management.
- Ability to integrate with multiple cameras & software.
- Reliable, consistent performance.
- Streamlined design & function controls.

Optional Accessories

- SmartReg
- Tethered scanner
- Stationary reader
- Handheld devices
- Label printer
- Asset tag printer (Asset Manager)
- Wristbands
- Capture solutions
- Webcam

Minimum Requirements

- CPU - P4 2GHz
- Microsoft XP or Windows 7 Pro 32 bit
- 2 GB Ram
- 10 GB free hard drive space
- Adobe Reader 7.0 (free version)
- Clean power
