Mobile Solutions® Asset App

## *Update Asset Inventory from Any Place, at Any Time within Seconds!*

Manage assets quickly using your mobile device.

Using the Mobile Solutions® Asset App from a smartphone, tablet, or handheld device allows users to perform inventory management, register a new asset, and replenish assets from any location. Users can securely access asset data including quantity, tag #, asset name, and description using the **Mobile Solutions® Asset App**.
Compatible with Android™ & iOS operating systems.
Inventory Management

Keep an accurate asset inventory, by updating your asset management software from anywhere, at any time. Simply enter an accurate count of assets in-hand, while on-site.

Register a New Asset

Identify and track any item from small electronics or expensive tools, to large vehicles and machinery. Track items by department, grant and purchase date.

Replenish Assets

Restock inventory by manually entering an item or scanning it's barcode before entering quantities added to inventory.

Maximized Connectivity

The Mobile Solutions® Asset App connects wirelessly to the Mobile Solutions® Data Server, which is hosted either locally at the Command Center or on an Internet Cloud. Mobile devices connect via WiFi, Cellular, Local WiFi, or a Network.

If a connection is lost or cannot be established, data collected & managed by the Mobile Solutions® Asset App is stored directly on the mobile device. Data can be synchronized once a connection is made.

Enterprise Grade Device

The XT1 handheld device provides a more ruggedized mobile device to partner with the Mobile Solutions® Asset App. It's features provide a higher level of quality for a solution that meets enterprise & government requirements including IP54 standards.

MS Asset App
*Licensing required for full functionality.
