COVID-19 ID Card Issuance
## Mobile Solutions®

Mobile Solutions® By Elliott Data Systems, Inc.

Mobile Solutions® provides an automated identification management and ID card issuance solution for COVID-19 testing using Mobile ID software and a secure ID card printing system. Design IDs to reflect pertinent information that identifies a person's COVID-19 test results, date of test, photo, name, etc.

For a more discreet display of information, you may want to utilize the Mobile ID Validation QR card feature. Simply include a Validation QR barcode on each ID to provide access to an online webpage that displays the necessary information needed to verify a person's identity and proof of testing.

DATA MANAGEMENT

> Manage collected patient/ recipient data using Mobile ID software which may include:
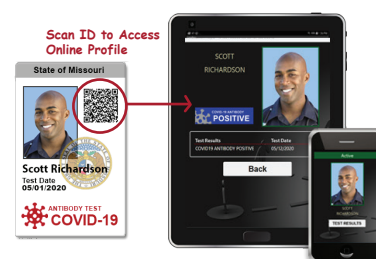

> Name
> Photo
> Phone #
> Test ID #
> Test Date

> Date of Birth
> Group Name
> Test Results
> Test Site
> & More

CARD ISSUANCE

> Print a plastic ID card that reflects a person's identity & COVID-19 test results.

> Decide what information should be displayed & choose security features such as laminates, tactile impression, watermarks, UV imprint, etc.

ID VERIFICATION

> Print a validation QR barcode on IDs to access an online validation profile page, which may store additional data.

> Access using smartphone/ tablet, any QR app, & internet.

Integrated Mobile Solutions®

Take your IDs to the next level by integrating Mobile Solutions® software to create a seamless identification and accountability solution to track and manage any event or location on-site.

Mobile ID
Mobile ID is an integrated software solution that has the ability to capture personnel data, manage that information in a shared database and print secure IDs.

Users can manage personnel records from an online Mobile ID web application or a Mobile ID client based traditional software solution that includes the ability to work with an ID printing system to print secure color photo ID cards.

EPIC Track
EPIC Track is a basic tracking solution used to track people, places and things. The software provides a time stamp during check in/out by scanning a barcode ID or selects from drop down lists.

The EPIC Track App performs tracking from a smartphone and provides greater connectivity due to cell phone tower connections.

EPIC Track is compatible with operating systems such as:

iPad and iPhone are trademarks of Apple.

Emergency Event Manager
Emergency Event Manager Software (EEMS) is an accountability solution which enables organizations to track attendees and manage an emergency incident scene on-site electronically, using an automated process that captures and manages event activity data.ns.com
